

FLAT-STOCK BENDING MACHINE

FPX

FLEXIBLE, MULTI STACK AND QUICK
CHANGE OVER TOOLING

Ø 9x4 to 12x4 mm
Ø .35x.15 to .47x.15"

FLAT-STOCK BENDING MACHINE

FPX

MAIN FEATURES

- 3D bending from coil
- 1 bending head with multiple radii
- Simple and easy to configure tooling
- Cutting by CNC 20T press unit
- Single minute exchange tooling
- Different press operations can be integrated upstream
- Integrated safety gate system

CONTROL

- Industrial PC based software
- Multilingual dialog and programming interface on a 19" touch screen
- Simulation program
- Additional I/O
- Internet connection : remote assistance and chat room
- Auto-corrective feedback from 3D-measuring devices
- Tool editor allows programming of complex parts with simple tooling

DIMENSIONS

- 4600x2000x1800mm
- 183x79x68"

WEIGHT

- 3000 kg
- 6000 lbs
